One-day Seminar

Sea Ducks and Renewable Energy in the Marine Environment

will be held on

Monday 16th April 2018

from

11.00 – 16.00

at

Field Studies Council Centre, Millport, Isle of Cumbrae

John Anderson

£50.00

Includes registration and lunch

Bookings can be made online at

Programme

10.30 Registration and coffee/tea

11.00 introduction and scope of the day

"To review the interactions between sea duck and marine renewables across Europe".

The meeting will consider the most recent knowledge on such interactions and will draw information from studies across Europe and from other parts of the world.

11.10 – 11.40 Presentation 1

Overview of interactions between ducks populations and renewable energy generation in the European marine environment.

Professor Tony Fox and Ib Krag Petersen, University of Aarhus - Denmark.

11.40 – 12.10 Presentation 2

Interactions between birds and renewable energy production – key approaches and case studies (*lessons learned from other bird species and marine renewables*).

Professor Bob Furness, MacArthur Green

12.10 – 12.40 Presentation 3

Overview of the marine renewables industry - the nature and future direction of the industry.

Erica Knott, Scottish Natural Heritage.

12.40 – 14.00 Lunch

14.00 – 14.30 Presentation 4

Interactions between sea ducks and marine renewables in North America – a case study.

Professor Scott McWilliams, University of Rhode Island - USA

14.30 – 15.00 Presentation 5

Review of diving behaviour in ducks

Dr. Alex Robbins, Scottish Natural Heritage

15.00 – 15.20 (Overview from countries)

To be confirmed

15.20 -16.00

Panel discussion of the key issues and identification of future priorities for action.

(Panel – Speakers)

16.00 Close

Part of the 5th Pan-European Duck Symposium
